Galleri® GRAIL Test

KESSLERTOPAZ MELTZERCHECK LLP

The Galleri screening opportunity remains available to eligible KTMC employees through the end of the year and may be completed at a Quest Diagnostics laboratory.

Visit **https://locations.questdiagnostics.com/locator** to find a Quest Diagnostics location near you.

Note: Eligible employees include those age 50 and older and those age 35 and older who qualify based on additional risk factors. A prescription is required.

What is the Galleri Test?

The Galleri test is a **multi-cancer early detection blood** test designed to detect a cancer signal associated with **more than 50 types of cancer**. It is intended to be used in addition to, not instead of, routine cancer screenings recommended by your healthcare provider.

To sign up, please complete the following steps:

- Visit: **www.galleri.com/partner/uswellnessgalleri**
- Click **"Request the Galleri Test"**
- Enter your Access ID, which is your Employee Email Address
- After creating an account, choose the **"Galleri @ Quest Diagnostics"** option to schedule your appointment
- After registering, you will be directed to complete the Galleri Questionnaire

Note: The test does not detect all cancers, and follow-up testing may be recommended if a cancer signal is found. To learn more, visit **https://grail.com/galleri-test/the-test/**.

Please Note: The Galleri test remains available through the end of the year. To be covered by KTMC, test kits must be completed and returned by **December 31, 2026**. Any kits that are unused or not returned by that date will not be covered.
